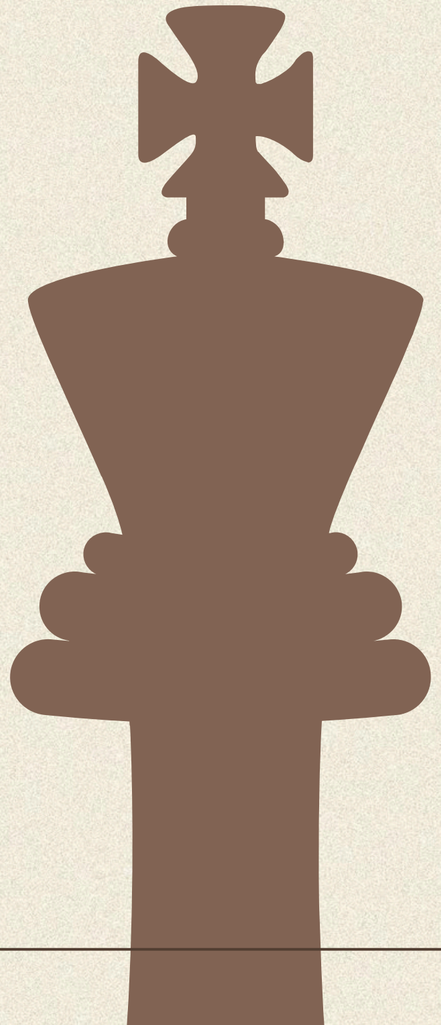
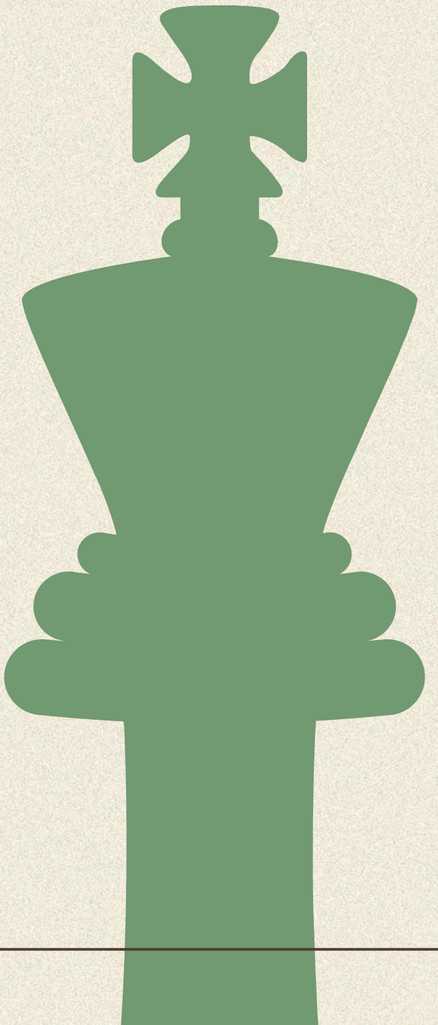
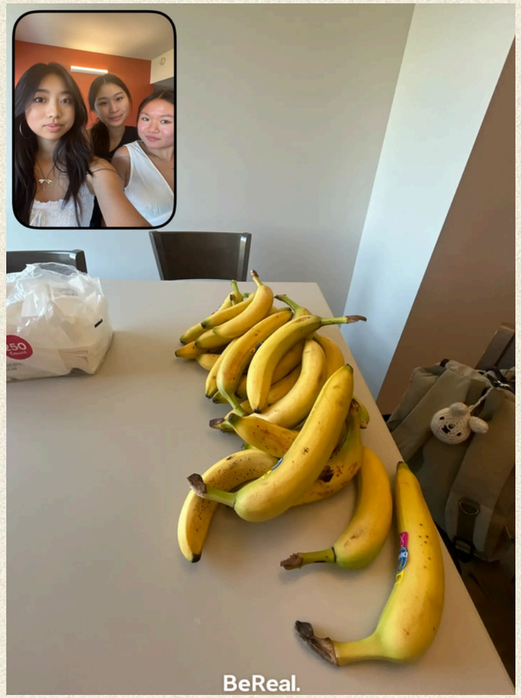
A BETTER CHESSBOARD

(ABC)





ABOUT ME

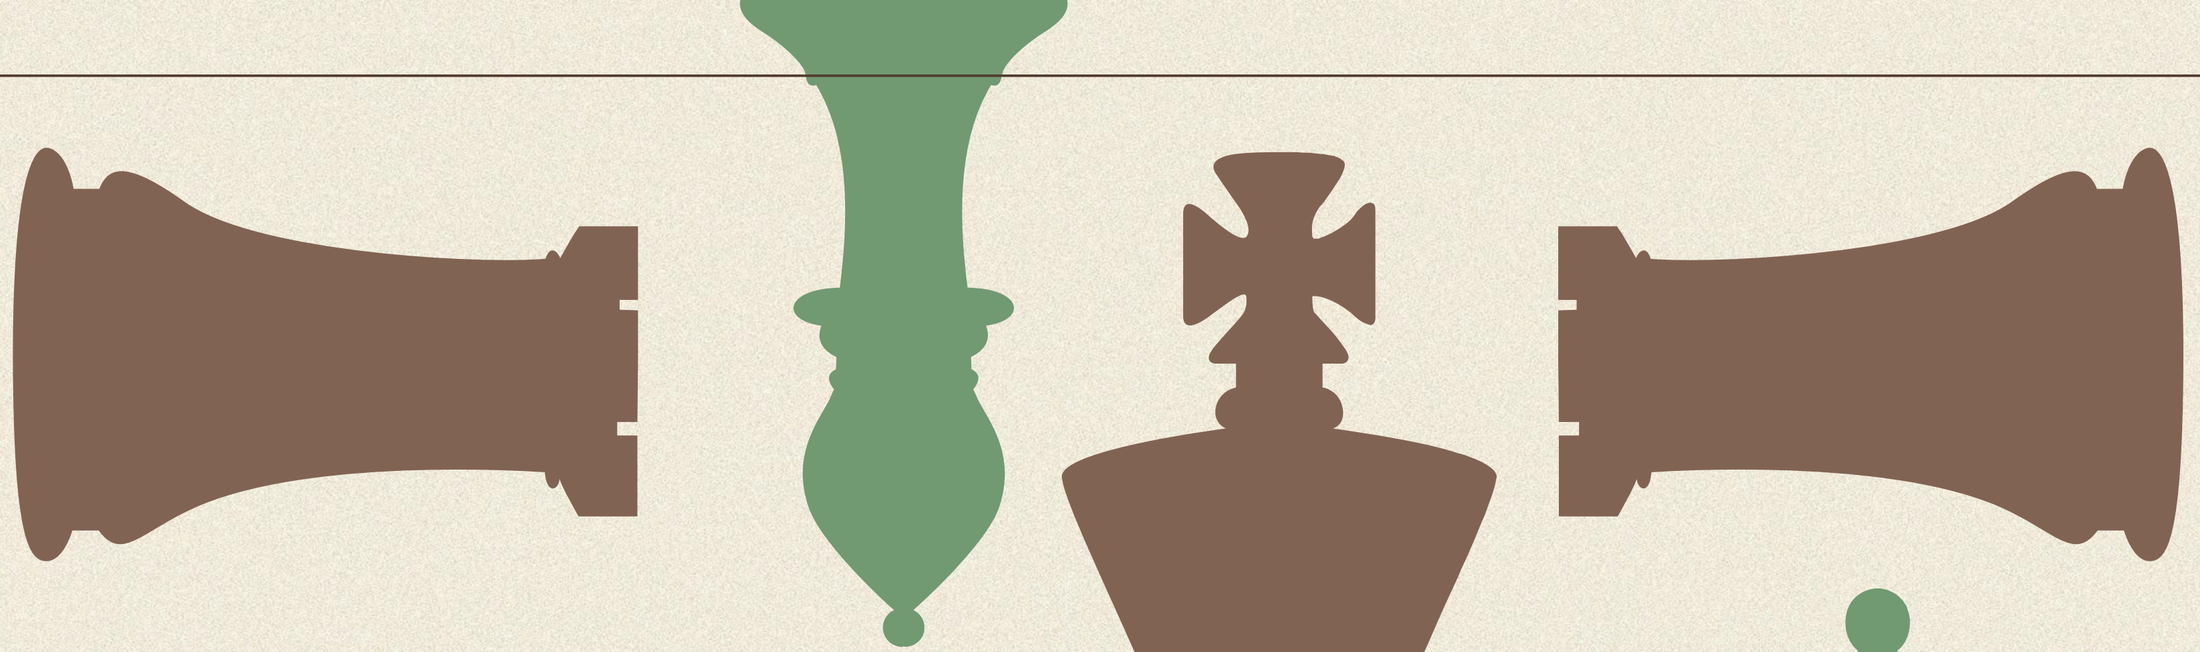


Senior in CS

I'm Vivien :)

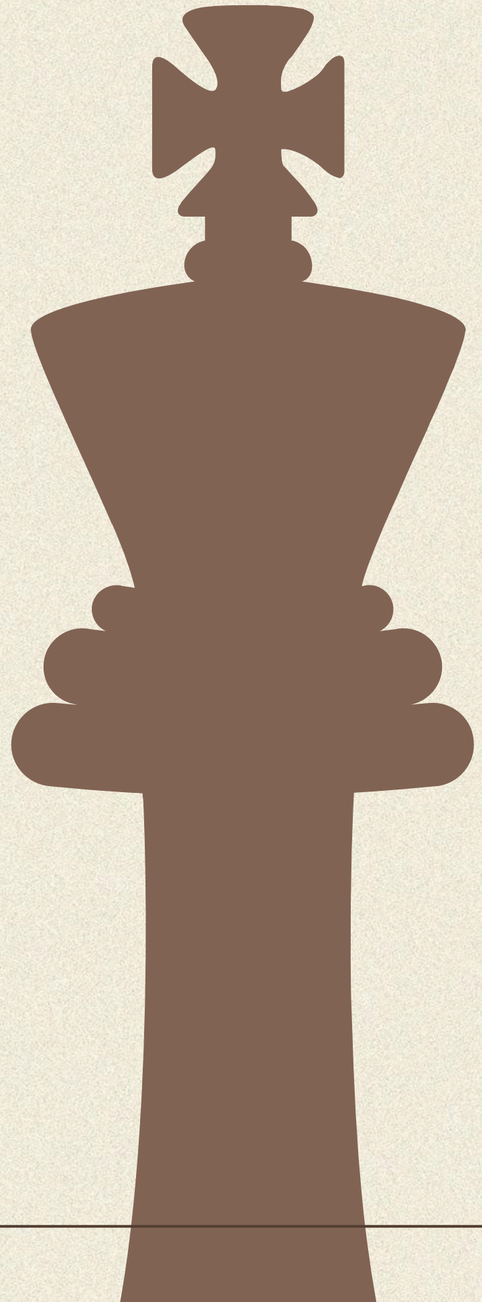
I joined Makers my freshman year!

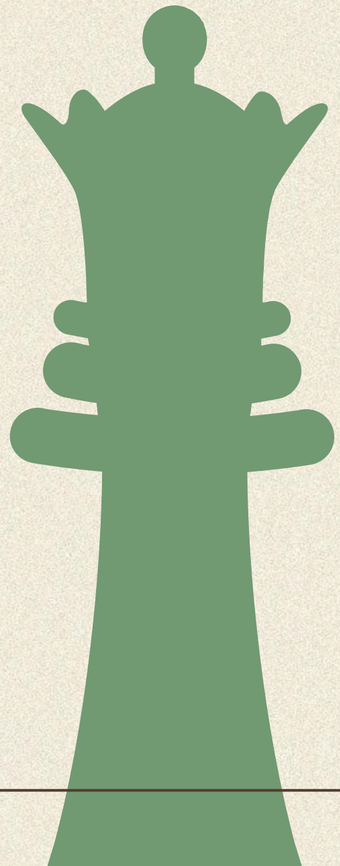
Hobbies: thrifting, pickleball, rock climbing



CHESS!

But better



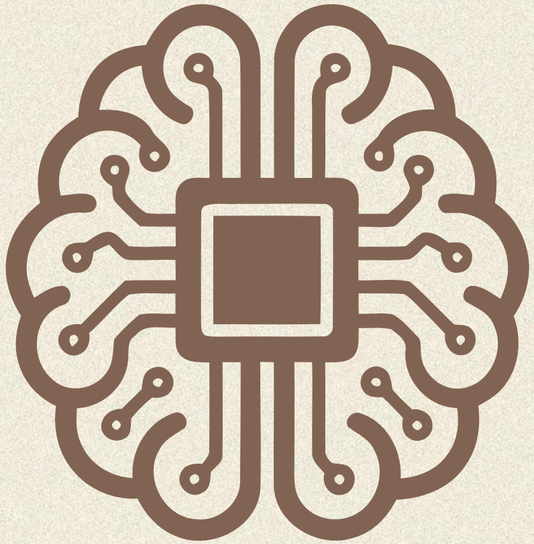


THE INSPIRATION

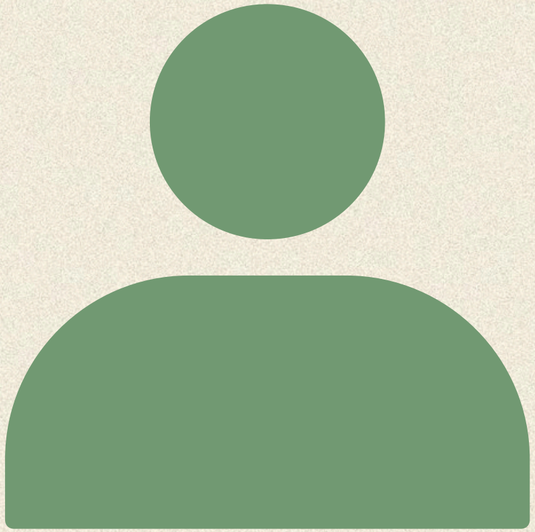
Pieces that move themselves...

Also chess.com!

THE CORE



VS



THE CORE

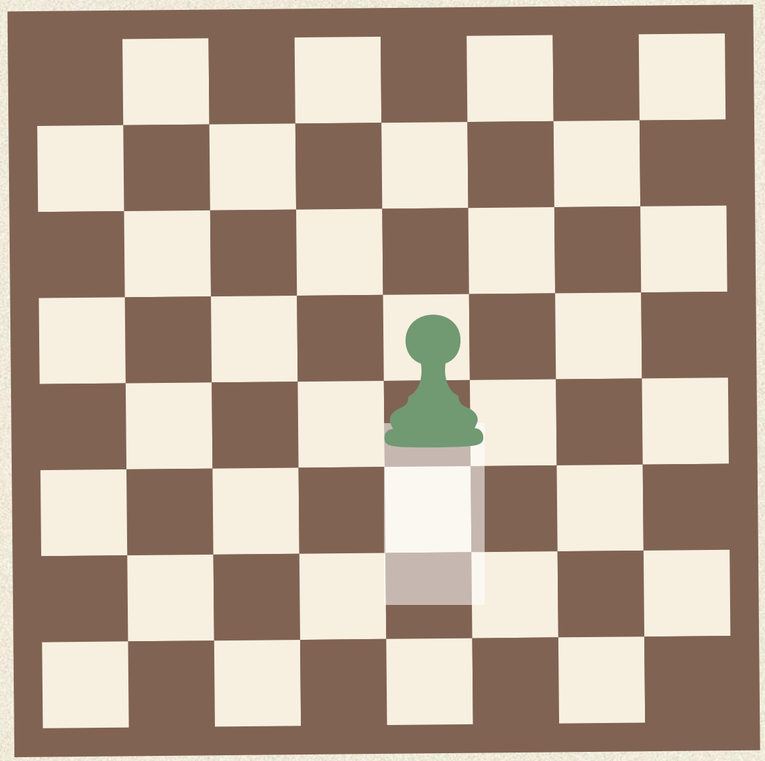
chess engine
analyzes best move...

VS



THE CORE

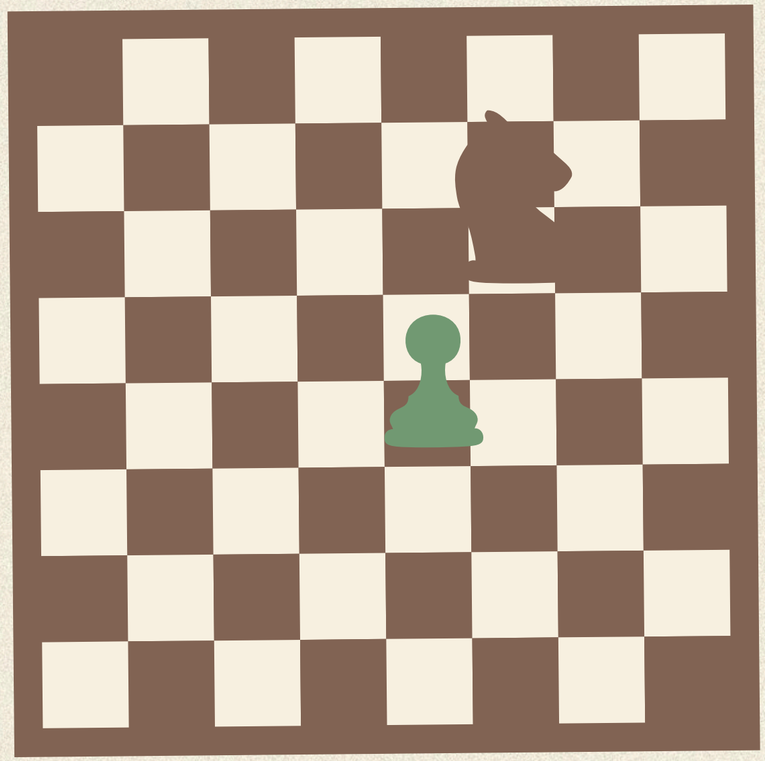
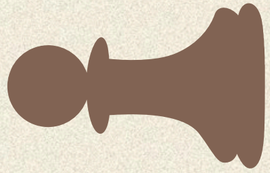
hidden XY movement system with an electromagnet moves the piece across the board

VS



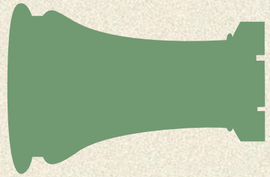
SUBTEAMS - THE CORE

CS



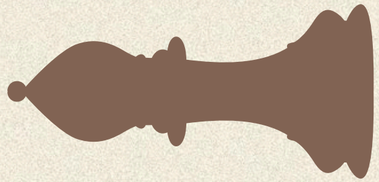
- board state + move validation
- chess engine integration
- system control/communication

EE



- electronics/motor control under the board
- LED feedback (indicate moves, errors, etc.)

MECHE



- XY movement system under the board
- piece design
- building the physical chessboard

core features working by fall showcase!

◆ Putting the BETTER in A Better Chessboard ◆

CHESSBOARD REMEMBERS YOU

Scan your face using a camera embedded in the king, and the board will recognize you and automatically restore the pieces to your last saved game state

TRANSFORMING CHESS PIECES

Pawns can physically transform (ex: into a Queen) when promoted

CUSTOM GAMEMODES

For example: Pawns with guns 🔫

TALKING PIECES

The pieces will speak to you

PLAY AGAINST YOURSELF

Train a chess AI on your own games and playstyle, then physically play against an AI version of yourself

AND MORE!

Have more ideas? We can build it!

additional features working by spring showcase!

WHY JOIN MY TEAM?

CREATIVE FREEDOM
FLEXIBILITY
NEW FRIENDS
IF YOU LOVE CHESS!
