
TRICK OR
TREAT

ABOUT ME

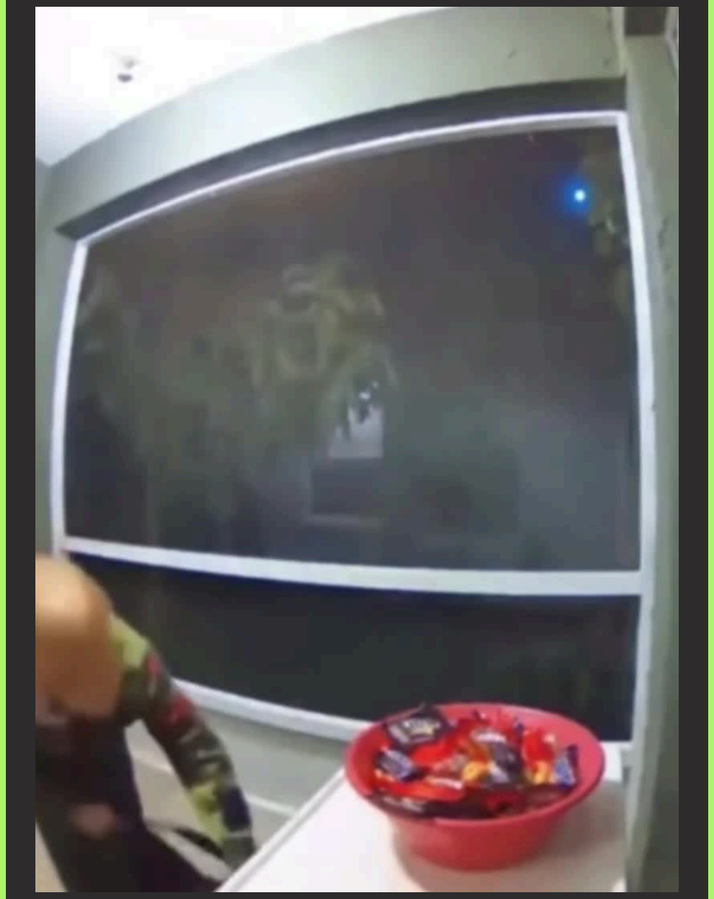

- Ruth Thomson
- Junior in MechE
- Hometown is Glasgow, Scotland
- Previous projects: DanceCam and FIFO
- Maker since Spring 2025
- Things I like: coke, escape rooms, field hockey and brownies and madeleines from target

INSPIRATION

- Going trick or treating so you're not able to hand out sweets at your house.
- People stealing entire bowls of candy left out on Halloween.

THE IDEA

A Halloween animatronic which detects when a new child has come up to it and dispenses a few sweets.

Buildable

- must haves:
  - a scary appearance
  - a way to detect when a new child is there
  - motion
  - detection of when sweets are running low
- add ons:
  - a punishment for coming back
  - smoke machines
  - tracking eyes
  - different levels of scariness depending on the age of the child

SUBTEAMS

MECHANICAL

- Designing the body of the animatronic
- Want to branch out from 3D printing

SOFTWARE

- Detection of when the sweet bowl is running low and sends a notification to the house owner
- Tracking eyes
- Person detection

ELECTRICAL

- Motor/power control
- Lights/smoke

WHY YOU SHOULD JOIN MY TEAM

- Branching out from 3D printing- lots of new skills
- Buildable project so will never be overwhelming
- Creative input wanted- not committed to a type of charcter
- Lots of socials- make genuine friendships
- Lots of Halloween sweets
